## POR PRESIDENT IN 1866, SALMON P. CHASE,

Subject to the decision of the National Con-

Shall Anything be Done! A few days since, we alluded to the fact that Portsmouth had prohibited the impertution of catalo from Massact meta, as and of preventing the destruction of the herds in that town. Since that action of the town, the disease has spread fearfully, and has approached this Island rauidly. It is now accertained beyond a doubt. to be in Beekonk and a neighboring town, and as we have previously stated, has reached Pawtucket of this State. This latter statement would scom to make the vote of Postsmouth defective, insamuch as there is nothing in it to prevent contagion being brought from any place except Massachusetts. A meeting of the State Board of Agri.

culture has been held this week in Boston, at which the State Commissioners appointed to eradicate the disease made both written and verbal statements, which were of an appalling character. From them it appears that there has not been known a single case of recovery—that the diesass is apparently rendered more virulent by warm weather -- that it is contagious, every case so far, being readily traced to the fatal source—that the pirus has been conveyed by allowing healthy cattle to drink from a vessel where diseased had previously slaked their thirst-that-which is very bad, if not the worst of all-one yoke of oxen from the injected district has been sold, and they cannot trace them or learn their whereabouts, thus poisoning perhaps anoth er large tract of country—that the disease has appeared in Sandwich, Barnstable County, down in the extreme Eastern portion of the State, and carried there by an animal sent there for beef, but who died before he could be slaughtered—that the commissioners are becoming worn out by their laborjous cuties, and withal, that there is now a strong probability that the disease will get beyond their control, and perhaps destroy the great cattle crop of our country.

We think, under these circumstances, that Congress ought to act at once, and er ergetically, too, if possible, to stay the plague. Ought not this city and Middletown also to act immediately? To take every step in their power to preserve this Island inject? No one can realize the injury that would arise if the disease should reach us. Take away the single article of milk, and what could we do? Where would our beautiful, rich butter come from? Where would our many articles of diet come from? How would the large number of innocent children fare, without their favorite, necessary beverage? Where would be our public houses? Where our cottages? In short, where our whole Summer business'?

Everybody sees that, if possible, the calamity should be averted. What should be done, is not so clear. Our City Fathers, by their superior wisdom, could devise the preventative, probably, and we do but express the common wish, that if they can, they will. We only add, that much good probably would arise by a unity of action between the three municipalities upon this subject, if it can be see 'We have confidence that if anything can be done by His Honor and the two Boards of the Council, that it will be done; but what that "anything" is, is a perplexing question to be decided. We hope for the best.

SINGULAR RESULT OF A BLAVER'S RUSE. SINGULAR RESULT OF A BLAVER'S RUSE.

The New York Herald's Havena correspondent writes that the capture of the slaver Wildfire happened in a very curious way. The captain of a slave brig nearer the land, fearing her character would be discovered, went on board the Mohnuk, discovered, went on board the Mohauk, and invited her commander to dine with him, remarking that he suspected the bark in sight to be a slaver, though really he had no such idea. The Mohauk accordingly gave chase and captured her, while the atratagem enabled the brig to land seven hundred negroes?

The Hartford Times of Monday says of the forwardness of the season in that vicinity: That thoroughly hooked up person, the "oldest inhabitant," sapereses himself as surprised at the general torwardness of vegetation at this season.—
Certainly the wrather and the verdure of nature peaks of the middle of the control of the season. certainty the wrether and the verdure of nature speaks of the middle of June rather than of May. Even the nights, usually so chills and raw in May, are of almost midsummer, temperature, and during the day the aun's firce beams assert their power in an unmistakeable manner.

The two sections of the Southern Over-land telegraph already completed, cover five hundred miles southwest from St. have audored miles southwest from St. Louis on the Atlantic sice, and four hundred and eighty miles south of Scn Francisco on the Pacific. It is in expectation, when the wires are completed to Los Andrews gelos, on the one side, and to Fort Smith, on the other, that a horse express will connect these points by runs of five days.

#### PROM CHICAGO.

CHICAGO, May 17.
The Platform Committee met-last night, when there were resolutions enough submitted to last twenty-five years. They wars all referred to a sub-committee, with

ware an instructions to make a platform as orier; no possible.

The Iowa delegation is strenuous for an anti-"Two years' amendment," (naturalization) plank; but will not be accommendated.

The subject of squatter soversignty was discussed freely, and some member strongly advocated a recognition of it; but a majority think it best to denounce the whole thing as a humbug, and meet Douglas squarely on that issue. The committee meet again this murries

this morning.

Mr. Seward's friends are preparing for a desperate effort to-day if a ballot is reached. Some delegations favorable to him have called special meetings to arrange plans of action. Thurley Weed says he is sure of Mr. Seward's nomination, but the outside feeling is that he cannot be nominated.

The Massachusetts delegation took an inormal vote this morning to give expressformal vote this morning to give expression to their preferences, with the understanding that on the decisive vote they might vote differently. Mesers. Boutwell, R. T. Davis, Hooper, Timothy Davis and Stone were absent. Mesers. Dunham, Rogers and Winn voted for Limoin of Illinois, and the rest for Savard. Illinois, and the rest for Seward.

The Platform Committee is still in ses-ion, and will probably continue so for curs. There is a warm di-cussion going on, but matters will work out clear.

The rules were taken up in order.

Mr. Corter of Ohio said, we are approaching the serious labor of the Convention, and the Credential Committee have not yet reported. He wanted an organiza-

trict of Columbia, but leave it to the Convention to decide whether they may vote.

Timothy Davis of Massachusetts moved to refer so much of the report as related to the Texas delegation back to the committee.

Mr. Wilmot of Pa. moved to recommit Kentucky and Virginia, as there was no constituency behind them, and it was not proper for them to come here and control this Convention. This was a Republican Convention, and that party was to elect the candidate if he was to be elected at all. If those delegates were admitted into the National Convention, there would be gennot elected by any body, brought up hy Northern influence. WATER OIL!!

LEBARD'S PATENT WATER OIL, to
burn in Kerosene Lamps, without the
smell and smoke of the Goal Oils, is the greatest stificial lightyet discovered. It gives a
steady, clear, soft light and does not choke
the lungs with foreign matter, such as resulte
generally from using Rosan and Kerosene Oils
or Coal Oas.

The flame can be regulated to allowed any

The flame can be regulated to afford any amount of light desired, from that of the large solar lamp to the feeblest taper. We therefore claim for the Water Oil the following as some of its loading characteristics:

1. It emits no feetild odor.
2. It will burn in Kerosene Lamps without alteration.

2. It will burn in Kerosene Lamps without alteration.
3. It is essentially an Oil, and yet will not grease the most delicate fabric.
4. It is less volatile than other oils, consequently will not consume as rapidly.
5. The flame is more purely white and soft than thatof any other Oil or Fluid. Therefore less injurious to the eyes.
5. The wick may be raised to a great height and breadth, giving an immense illuminating power without producing smoke.
7. Its great specific gravity tenders it not only safe, but the most conomical Unit in existence.

istence.

8. It does not crisp the wick like Oils, nor deposite any carbonaceous suclupion it.

9. It does not waste, as every globule of Oil and every particle of Water is entirely consumed.

The following is the Certificate from Dr. Hayes, on the illuminating power of the WATER OIL as compared with the best stilled of Kernsene Oil in the market.

Results of comparison of the light of two lamps, one fed with Kerosene Oil, and the other with Water Oil, furnished by B. F. Hebsrd.

The Kerosene Lamp when lighted soon increased its volume of flame, so as to present a dull halo above the brilliant part; it was adjusted to the highest soin without producing smake. On lighting the lamp fed with Water Oil, it was found that its flame was luminous and might be much extended, with-minous and might be much extended, with-minous and might be much extended, with-Water Oil, it was found that its flame was luminous and might be much extended, without the production of smoke. A definite point perfectly practical, was reached, when the Keresene Lamp being 103, the Water Oil Lamp sforded the light of 122, without a trace of smoke emitted. The Water Oil permits of any diminuation in the flame without loss of economy.

Respectfully,

A. A. HAYES, M. D., State Assayer.

THE COVODE INVESTIGATION.—DISGRACE-FUL SCENE.

A violent and extraordicary scene occurred in the Covode committee room today. Mr. Schnabel had been recalled to close testimony, and Judge Black was present by his own request, expecting to conduct the cross-examination, but the Committee decided that he must only submit questions in writing through Mr. Winstow, one of its members.

Schnabel proceeded to give a history of his political relation to the administration, and why he went to the Constitution office to demand a cessation of the attacks on

STRANGERS AND TRAVELERS,

Proudly refers to Professors and Physicians; many of whom consult him in critical cases, because of his acknowledged skill and repu-tation, attained through so long experience, practice and observation.

AFFLICTED AND UNFORTUNATE!

Through false Certificates and Heterences, and recommendations of their medicines by the dead, who cannot expose or contradict them: and who, besides, to further their imposition, copy from Medical bonks much that is written of the qualities, and effects of different herbs and plants; and ascribe all the same to their Pille. Extracts, Specifics, &c., most of which, if not all, contain Mercury, because of the ancient belief of its "ciring everything," but now known to "kill more than is cured," and those not killed, constitutionally injured for life.

CITY COAL YARD.

YHENS VALLEY FRANKLIN

COAL.

The subscribers take this method of returning thanks to their many patrons for the increased orders from year to year, for their LYKENS VALLEY FRANKLIN COAL.

The mines from which this Coal is taken were never in so promising a condition as at present, and such improvements have been made for preparing and sociening it as warrint us in saying that we believe the Coal will be shipped in better order than ever before.

The superior quality of the Franklin Coal having become fully established, the demand has rapidly increased; and an evidence of its great popularity is the fact that: several dealers have adopted its name in full or in part, thereby hoping to introduce other kinds of inferior Coal by which the public have often been deceived.

Waiting your favors, we are ten been deceived.
